

## Mammography Research

We are committed to improving breast cancer screening by participating in research to study how we use mammograms to detect breast cancer. To help with this work, images and data from this centre are used for research to improve future screening, patient care and treatment for breast cancer. However researchers will not be able to see your name or any data that could identify you.

### Safeguards

- **All data used in research is de-identified so that it will not be possible for researchers to identify you from this data.**
- **Research is subject to ethical approval**

*“The NHS commits to anonymise the information collected during the course of your treatment and use it to support research and improve care for others”. - NHS Constitution*
